

# RE4Industry

100% Renewable  
Energies for  
Industries

## RE4Industry Committee EU

### Committee

You'll be **one of the EU-level representatives within the highest expert group in RE4Industry**, contributing as **leader of the policy and advocacy dialogue at European level**. Your contribution will shape policy recommendations for integrating **100 % Renewable Energy** in Energy Intensive Industries (EII's).

### Benefits

- Recognition as **one of the main representatives at EU level** in renewables for EIIs;
- **Shaping** policy recommendations and influence the outcomes and strategies of the project;
- **Knowledge exchange** and with national and insights into renewable and decarbonisation strategies;
- Very first insights to the most relevant **project outcomes**, based on the work **performed** by the working groups within RE4Industry;
- High-level of **networking** with international actors in the sector and **invitation** to high-level meetings that can lead to the creation additional **synergies** and potential **funding** opportunities;
- **Full visibility** on our project website and all public communication materials and channels.

### Role

Highest-level consultation, offering strategic information about the **EU policy framework** and **priorities** towards decarbonisation, **building and transferring** the project results and **vision** to decision-makers.
