**At a
glance**

**RE4Industry: 100% Renewable Energies for Energy
Intensive Industries**

**Project Coordinator:
FUNDACION CIRCE - CENTRO DE INVESTIGACION DE
RECURSOS Y CONSUMOS ENERGETICOS**

11 partners from 6 countries (AT, BE, DE, ES, GR, NL)

Total EU contribution: € 2 999 500 (total cost)

Starting date: 1st September 2020 - Duration: 36 months

RE4iINDUSTRY

Context

The EU has started a progressive decarbonisation with the **aim to become carbon neutral by 2050**. Energy Intensive Industries (EII) are expected to play an important role in this transition as they represent 24% of the final energy consumption, but **a clear long-term vision and strategy is required** in order to remain competitive while contributing to the decarbonization targets of the EU.

RE4Industry has been conceived under this framework with a twofold aim:

- to support EII in the **identification and integration of renewable energy (RE) solutions** together with the definition of **Action Plans for decarbonisation**
- to transform the EU industrial landscape into **a large market niche for the uptake of RE** while defining the appropriate framework conditions for **short- and long-term scenarios**.

Goals

1

To set a multi-actor collaborative network, involved and actively compromised to gather and identify the needs of the sector, in order to make possible this transition

2

To show the RE technologies with more potential to be utilised by Ells or integrated in their industrial processes, and mark the path in the short (2030) and long term (2050)

3

To identify, visualise and share success stories of Ells already adopting RE with the innovations

4

To promote the early transition of Ells by means of a direct accompaniment within companies

5

To achieve a common understanding and vision of the role that Ells have to play towards 2050 a RE consumers and potential RE promoters

6

To promote a more favourable policy and market framework to allow the competitiveness of RE based Ells goods

7

To ensure a growing interest and alignment of European society by means of a strong and coordinated communication campaign coherent with Ell sector messages

8

To empower the sector and key organizations through knowledge transfer, strategic positioning and cross-border actions

SHORT-TERM VISION

2030

LONG-TERM VISION

TECHNOLOGY OPTIONS

- Conventional RE heating / power
- New RE (solar thermal, bio syngas)
- H2 (electrolysis / syngas)
- E-fuels (synthesis fuels from RE based hydrogenation of CO2 captured)

ACHIEVABLE RATES

- CO2 balance ≤ 0
- RE use = 100%

CURRENT SECTOR NEEDS

- Scope to understand the future options on RE
- Implications for retrofitting to produce and adopt e-fuels
- Energy balances and key indicators of adopting each RE alternative (for an early decision making in short-medium term)
- Expected costs for RE use

2050

TECHNOLOGY OPTIONS

- Conventional RE heating
- Biomass
 - Bioenergy carriers
 - Solar (high temperature)
 - Geotherm

ACHIEVABLE RATES

- CO2 balance > 0 (reduced according to RE use)
- RE use $< 50\%$

CURRENT SECTOR NEEDS

- Existing options for retrofit
- Cases already implemented
- Lessons learned
- Insight in cost / economics
- Opportunities (e.g. for financing, long term RE contracting)
- Positive social perception
- Influence for a better framework

Vision

RE4iNDUSTRY

RE4Industry actions

A strong engagement strategy following a multiactor approach

A dialogue with and within EIs and EI organizations

A thoughtful review of RE technologies and options for a 100% RE production by 2050

Insights into industry retrofitting and promotion of RE integration

Recommendations for the uptake of RE by EIs and advocacy

Multiplication and replication

A solid dissemination and communication strategy

Collaborative Network

RE4Industry Committee EU

As part of the RE4Industry Committee at EU level, you'll be **one of the EU-level representatives within the highest expert groups in RE4Industry**, contributing as **leader of the policy and advocacy dialogue at European level** and transferring solutions to their highest bodies

Contribution

RE4Industry Committee EU

- Highest-level consultation, offering strategic information about the EU policy framework and priorities towards decarbonisation, **building and transferring** the project results and **vision** to decision-makers.
- Participate in **vision sharing and policy advocacy** activities of the RE4Industry project (e.g. in RE4Industry fora” which consists of meetings and workshops connected to events of relevance -like fairs, summits, or thematic weeks).
- Virtual meeting every six months and two physical meetings (around February 2022 and August 2023). A budget for the participants is already foreseen.

Collaborative Network

RE4Industry Committee EU

The benefits of the committee

- ☞ Recognition as **one of the main representatives at EU level** in renewables for energy intensive industries;
- ☞ **Shaping** of the outcomes of the project towards **your interests**;
- ☞ High level of **knowledge exchange and networking** with national and international **actors in the sector**;
- ☞ Participation in the **construction of a EU policy recommendation for the sector and in the policymaking**;
- ☞ Very first insights to all **project outcomes**, based on the work **performed** by the lower working groups within RE4Industry;
- ☞ **Full visibility** on our project website and all public communication materials and channels.

Specific Project Results of Interest:

TG Energy Intensive Industries

- Report on **Barriers, Drivers and Opportunities** for RE market (3/2023);
- Report on **Success cases** of integration of **RE in EIs** (2/2022);
- **Case study** highlights in **RE adoption** by 3 EIs in **Steel, Aluminum and Chemical** sectors (2/2023);
- EIs **Sector status in EU** report (2/2022);
- **Mapping tool** of the EIs per sector in Europe (8/2021);
- **Handbook** for transition towards **100% RE-based production** of EIs (8/2023);
- **Feasible technologies and requirements** for RE integration (2/2023);
- RE4Industry **Brochure** (4/2023);
- **Common vision** for decarbonization of EIs in **Europe** and **policy recommendations** (2/2023).
