

RE4Industry

**100% Renewable
Energies for
Industries**

RE4Industry Committee GR

Committee

As part of the RE4Industry Committee for **Greece**, you will be **one of the leaders of the policy and advocacy dialogue at national level**.

Your contribution will shape policy recommendations for integrating **100 % Renewable Energy** in Energy Intensive Industries (EII).

Benefits

- Recognition as **one of the main representatives of your country** in renewables for EIIs;
- **Knowledge exchange** about the **opportunities** and **barriers** for decarbonisation of **EIIs and EEIs Sector Status in Europe**;
- High level of **networking** with national and international actors in the sector and **invitation** to relevant project meetings;
- Participation in the **construction of an EU vision and strategy for the full decarbonisation of the system**, while collaborating in shaping the sector's vision;
- **Open door for participation** in future EU-funded **projects** and synergies;
- Very first insights to the most relevant **project outcomes**, based on the work **performed** in some of the **major European EIIs**;
- **Full visibility at EU level**, on our project website and all public communication materials and channels.

Role

High-level consultation, offering strategic information about the **national policy framework** and **priorities** towards decarbonisation, **building and transferring** the project results and **vision** to decision-makers.
