

RE4Industry

**100% Renewable
Energies for
Industries**

**RE4Industry
Cluster: ES**

Cluster

As part of the RE4Industry cluster for **Spain**, you will be part of a **national multi-thematic technical expert group**, unique in its kind. Your deep and extensive knowledge and background on the technical side will contribute to the **definition of a 100% renewable vision for European energy intensive industries**.

Benefits

- Full and very first insights to the most relevant **project outcomes**, based on the work **performed** in some of the **major European energy intensive industries**;
- **Insights in opportunities and barriers** for decarbonisation of **energy intensive industries**;
- Being part of an extended collaborative network of national and international **actors** with significant **knowledge exchange, networking** and potential **EU-funded research opportunities**;
- Gain **firsthand knowledge** on the **feasibility of the RE options** and its integration on EII's from **case studies** and other experts within the **network**;
- **Full visibility at EU level**, on our project website and all public communication materials and channels;
- Updates on **tailored events, seminars or other actions** based on your interests.

Role

Top notch consultation for the project, providing invaluable **technical** feedback about processes, experiences with technologies and new developments.
