100% Renewables in Energy Intensive Industry

May 2021 - Newsletter #1

What is RE4INDUSTRY?

The project will facilitate for the **energy intensive industry (EII)** sector in Europe a smooth and more secure transition to the **adoption of Renewable Energies (RE)** in their production processes and facilities.

RE4Industry has been conceived under this framework with a twofold objective: to **support EII in the identification and integration of renewable energy (RE) solutions** together with the definition of Action Plans for decarbonisation, and to **transform the EU industrial landscape into a large market niche for the uptake of RE** while defining the appropriate framework conditions for short- and long-term scenarios.

What happened in the past months?

September 2020 RE4INDUSTRY kicks off!

Find out more about the project paving the way towards **100% renewable energy in industries** all the while developing a 2030 and 2050 vision!

[Who's who in RE4INDUSTRY?](#)

February 2021 Starting the new year at high level events!

Diving into **sustainable bioenergy**: a circular approach to EU strategic autonomy and green transition at the EU Industry week!

[What happened there?](#)

April 2021 RE4INDUSTRY talking biomass!

We couldn't miss EUBCE 2021: the world's biggest **conference and exhibit on biomass!**

[What about it?](#)

WE WANT YOU!

Are you...

- ...looking for **great networking opportunities and visibility** within the renewable world?
 - ...looking forward to **sharing your insights** about renewables in energy intensive industry?
 - ...interested in **participating in the proceedings for the decarbonisation of the sector?**
- Then join our...

RE4Industry Collaborative Network

A multi-actor network of stakeholders that acts as a key consultation body

Different groups at national or EU level, offering advice on aspects to facilitate the industrial energy transition to renewables!

JOIN US!
